

# SPECIAL FEATURE

## 2023 INNOVATION AWARDS

### WET/DRY VACS

#### Cleva N.A.

The Vacmaster Professional Beast Series vac features a high-performance, 6.5-hp motor, a flat power head for increased tool storage, a large dust-sealed power switch, and an extra-large drain port. The unit also converts to a blower.

#### Kärcher

The Kärcher WD 6 P S wet/dry vac features a stainless steel, 30-liter tank and 260 watts of suction power. Semi-automatic filter cleaning moves pulsed air from the filter to the container, extending the filter's life.

#### Koblenz

Contractor Series vacuums include a 35-foot pig-tailed line cord that can be quickly replaced in the field, caster wheels with brakes, on-board tool storage, and a rainproof design. Units range from 6 to 16 gallons and 5.0-6.5 peak horsepower.

### ROBOTIC LAWN MOWERS

#### Worx

The Worx Landroid Vision's neural network can distinguish grass from children, pets, wildlife, and other obstacles. The unit's push-button operation doesn't require extensive set-up or use boundary wires or antennae. The mower can also manage multiple zones.

#### Husqvarna

The Husqvarna Automower NERA comes in three models for lawns from 2,200-5,000 square meters. Installation and definition of work areas and stay-out zones are easily managed through the Husqvarna Automower Connect App.

#### Merotec USA

Yard Force robotic mowers feature a rain sensor that returns the mower to its charger automatically and a mulch system to reduce waste. Additional features include cutting heights from 1.3" to 3" and added protection with lift, tilt, and obstacle sensors.

## HOW THE PROS GET IT DONE.

Experience unsurpassed performance and convenience with Vacmaster Professional Wet/Dry Vacuums. With SecureLock™ locking accessories and the Beast Series™ high performance motors, discover best-in-class vacs designed to deliver superior power with ongoing improvements for ultimate customer satisfaction.
